Correction Regarding Army – Important Upload & Download Changes to ODS Coming Soon

In order for the Operational Data Store (ODS) system to comply with Authority to Operate (ATO) and FISCAM requirements IATS users will need to perform upload and download via secure file transfer protocol (SFTP).

Planned implementation for this change will be within the next 90 days, and will obviously require an emergency software change for IATS users.

Newsletter from previous month stated/implied that only Tectia software would be programmed for use within IATS, but upon further review since the Army has certified use of WinSCP that software will also be programmed, so that either Tectia or WinSCP can be utilized by an individual Army site for secure system-to-system transfer of upload files to/from ODS.

Once the actual crossover date to the SFTP process is determined we will let everyone know.

Mike Canada

IATS Version 6.21 Features:

Maintenance Configuration Change Report
