

Creating a Dump Traveler

In order to avoid a PII violation when providing a Dump Traveler to the IATS System Management Office or IATS help desk, please follow the procedures below.

1. On the Examiner view, click on Tools and select “Dump Traveler”. On the Select Traveler screen enter the SSN or Name. Click OK.
2. On the Traveler Selection screen check the “Obfuscate Sensitive Data” box then click ok.

Traveler Selection (ORIGINAL MASTER DATABASE)

UserID: SYSTEM For Official Use Only Wednesday, March 22, 2017

Find SSN: 159357357 Name: JOE, JOE J

Address 1: 125 EAST ST Grade/Rank: C

Address 2: Org:

City: INDIANAPOLIS DSSN: 5570

State: INDIANA

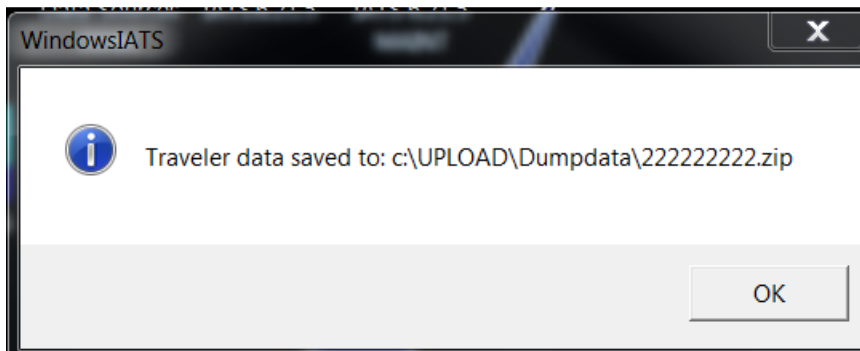

Zip: 46220

Obfuscate Sensitive Data

OK Cancel Help

Press OK to select this Traveler

1. The Dump Traveler that is created will have a generic SSN and the zip file will be named “22222222.zip” instead of the actual SSN (i.e. 123456789.zip).

2. Change the dump data extension name from .zip to .zzz and attach to the email to the HELP DESK or IATS functional staff.

THANKS FOR YOUR SUPPORT.
