Insure the traveler has a valid mailing address to receive future W-2s

Mary Thieryoung

Navy Travel Coordinator

When entering travel claims into IATS, for disbursement by ADS, please make sure to enter a valid mailing address for the traveler. Without having a valid mailing address, future W-2s are being delayed in being received by the traveler. Invalid mailing address affects; delays the traveler in receiving their future W-2; increase double and even triple the postage costs for mailing duplicate W-2s for one traveler, and corrections made to the W-2s are a manual process and time consuming. Cost adds up by missing a valid mailing address. For more information contact (216) 204-7700.

Free Software Helps Wage Reports Accuracy

AccuWage/AccuW2C is free software from Social Security. It allows you to check W-2 (Wage and Tax Statement) and W-2c (W-2 correction) reports for correctness before you send them to Social Security. Using AccuWage and AccuW2C greatly reduces submission rejections. Download the latest version of the AccuWage software before you prepare your wage reports each year from: <http://www.ssa.gov/employer/accuwage/index.html>
For more information go to www.socialsecurity.gov/employer/software.htm

Sybase Support for Version 9 Discontinued

As of January 31, 2010 support for Sybase version 9 **has been discontinued**. Sybase Version 10 for IATS was first packaged with version 6.12. Any sites running an older version than that should at least upgrade to that release ASAP.

When was the last time you ran your system tools? CHKDSK or DEFRAG

Is your overall computer running slower and slower? How about your server? When was the last time any system tools were run? Was a DEFRAG run on the computer in the last month or the last year? As a measure of preventative maintenance (PM) you should consider setting into your schedule some PM on your computer(s) in the near future.
