ODS SuperCluster Migration

Users that upload to ODS need to make sure they enter their SuperCluster password into IATS. When they do this, they want to make sure the ODS User ID is in lower case and the Issue Date is changed to the date they were issued their SuperCluster password. If they have an “ods-iats” profile created in their SFTP software (i.e. WinSCP, Tectia, or IPSSwitch), they will want to enter their SuperCluster password there too and again, make sure their ODS User ID is in lower case. If you have any questions, contact the IATS Help Desk.
